Plan briefing for team leaders · November 2026

Your 100 USDT term, run by code.

Daily growth for up to 40 days or until the 2X cap, 25% level income across 100 levels, and a daily royalty pool. Every rule is enforced by an immutable contract and every number can be checked on-chain.

Non-custodial

You sign every transaction

Immutable contracts

Six numbers.
That is the whole plan.

Nobody can change these after deploy, not even the admin. The contract is the agreement.

One ID

100 USDT

Your wallet is the login. One payment through the contract creates the ID and starts your first term.

Daily growth

5–10 % a day

5% to start, +1% for each active direct, up to 10% with 5 active directs.

Term limit

40 days or **2X**

Growth stops at 200 USDT or after 40 days, whichever comes first.

Level income

25 % · 100 levels

A quarter of every top-up is shared up 100 levels. Each active direct unlocks 10 levels.

Royalty pool

3 + 2 %

5% of every top-up: 3% normal for leaders with 10+ active directs, 2% super on top.

Withdrawals

5 % fee · 3 USDT min

The admin's only income. Growth, level and royalty income are all withdrawn the same way.

Connect, top up, withdraw. Then start again.

One term runs at a time. A new 100 USDT top-up is possible only after the current term ends, and every top-up pays level income and the royalty pool again.

1

Connect

Open the app inside Trust Wallet, MetaMask, TokenPocket or SafePal. No email, no account.

2

Top up 100 USDT

Approve USDT, then top up with your sponsor's address. The sponsor link is permanent.

3

Growth accrues

Whole days from the day your term starts, at your current rate. Level and royalty income arrive alongside.

4

Withdraw

Any time your balance is 3 USDT or more. You see the net, the fee and your wallet before you sign.

5

Term ends

At 2X or day 40. Unwithdrawn growth stays yours. A fresh 100 USDT starts your next term.

While no term is active	You earn no level income: anything due to you goes to the growth pool and cannot be reclaimed later. Royalty also needs active directs. Keeping your own term active is what keeps you earning.

70 · 25 · 3 · 2.
Split on every top-up.

No money leaves the contract at top-up time. Each share is either credited to a member's withdrawable balance or booked into a pool inside the contract.

Growth pool

70 USDT

Stays inside the contract as the treasury pool. It is the only source that pays daily growth.

Level income

25 USDT

Credited to up to 100 uplines' balances.

Normal · Super royalty

3 + 2 USDT

Today's royalty pots, split at 00:00 UTC.

What happens to income nobody qualifies for

A level share for an inactive or locked upline, and a royalty pot with no eligible holders, both lapse into the growth pool. It strengthens the pool that pays everyone's growth.

Nothing else can fill or empty the pool

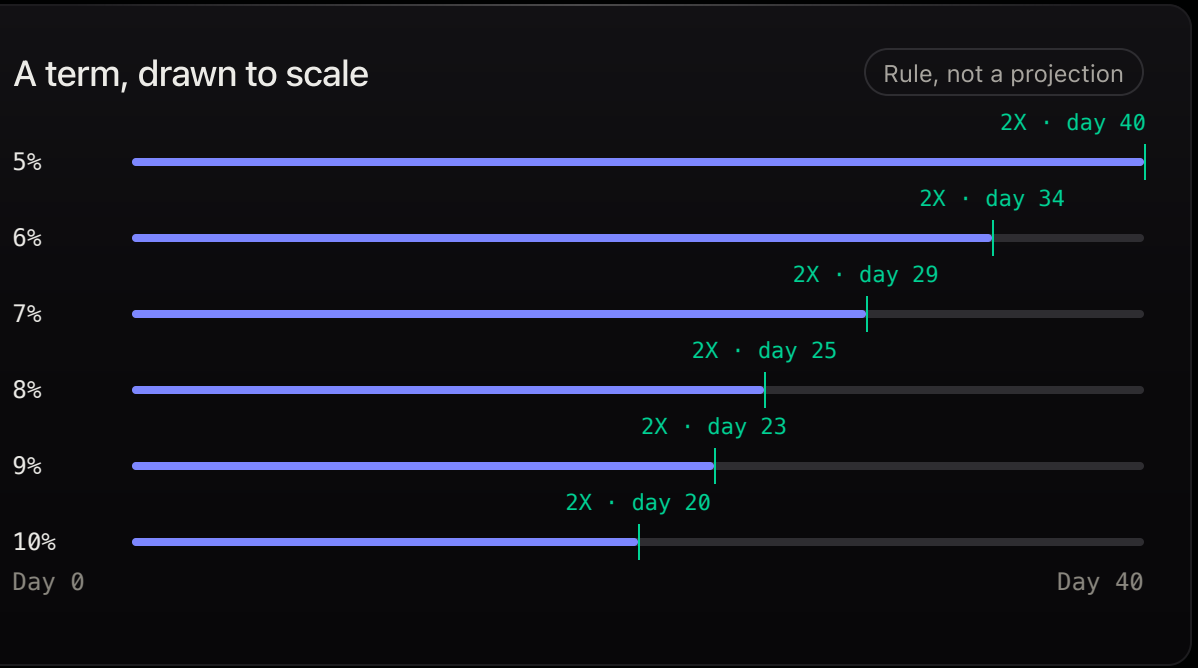

Top-ups are its only income. There is no treasury wallet, no funding function and no sweep. Money leaves only as member withdrawals and the 5% fee.

Active directs set your rate. The 2X cap sets the finish.

Your rate is 5% plus 1% for each direct with an active term, up to 10%. A higher rate reaches the 200 USDT cap sooner; the cap never moves.

Active directs	Rate	Per day	2X on day
0	5%	5 USDT	40
1	6%	6 USDT	34
2	7%	7 USDT	29
3	8%	8 USDT	25
4	9%	9 USDT	23
5 or more	10%	10 USDT	20

Per 100 USDT term. The last day pays only what is left to 200.

Only growth is capped at 2X; level and royalty income sit outside the cap. A rate change applies from the next whole day.

25% of every top-up, shared up 100 levels.

Each time anyone in your downline tops up 100 USDT, the contract walks up to 100 uplines and pays each one its level's share, straight into their balance.

Level	Per level	USDT per 100	Band total
1	5.00%	5.00	5.00
2	2.00%	2.00	2.00
3	1.00%	1.00	1.00
4 – 7	0.50%	0.50	2.00
8 – 22	0.30%	0.30	4.50
23 – 49	0.20%	0.20	5.40
50 – 100	0.10%	0.10	5.10
Total			25.00

Each active direct unlocks 10 levels

1–10 | 11–20 | 21–30 | 31–40 | 41–50 | 51–60 | 61–70 | 71–80 | 81–90 | 91–100

Example: 3 active directs open levels 1–30.

1 direct · levels 1–10

10 directs · all 100

You are paid for a level when both are true

- **Your own term is active** (inside 40 days and below 2X).
- **The level is unlocked:** 10 × your active directs, up to 100.
- If not, that share lapses to the growth pool. It is never held for later.

Two royalty shares, split equally every UTC day.

5% of every top-up across the whole plan builds two daily pots. Each pot is divided equally among the leaders who qualify for it at the daily boundary.

Normal royalty

3% of every top-up

10 active directs

- **Qualify:** 10 or more directs with an active term.
- **Window:** 100 days from your first top-up. It never pauses or extends.
- Drop below 10 and it stops at once; back to 10 and it resumes.

Super royalty

2% of every top-up

2 royalty-holding directs

- **Qualify:** hold normal royalty yourself, and have 2+ directs who also hold it.
- **Stacks:** super holders keep their 3% normal share as well.
- If only one leader qualifies, that leader takes the whole 2% pot.

How a day splits
arithmetic, not a projection

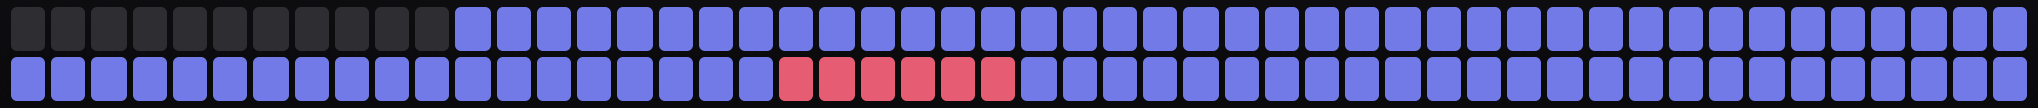

200 top-ups in one UTC day put **600 USDT** in the normal pot. With 30 normal holders at midnight, each gets **20 USDT**.

The same day puts **400 USDT** in the super pot. With 4 super holders, each gets **100 USDT** on top of their normal share.

Settled at 00:00 UTC. Once a day, worldwide.

Top-ups during UTC day D fill day D's pots. At the next midnight UTC they are split among the leaders eligible at that exact moment.

The 100-day window, with a 6-day gap

Paid day · Below 10 active directs · lost · Before qualifying

Example: a leader reaches 10 active directs on day 12, drops to 9 on day 70 and is back at 10 on day 76. Days 70–75 are lost for good, and the window still closes on day 100.

Become eligible before midnight

You earn that day's share.

Lose eligibility before midnight

You lose that day's share. Missed days are never restored.

Nobody eligible that day

That pot moves into the growth pool.

One withdraw button.
One fixed fee.

Growth, level and royalty income sit in one balance. Withdraw any time it reaches 3 USDT; you pull it to your own wallet, nobody sends it for you.

Example withdrawal

95.00 USDT net

Gross	100.00
Admin fee 5%	− 5.00
To your wallet	95.00
Minimum (3 USDT gross)	2.85 net

Growth is paid from the pool

Each withdrawal pays the smaller of your owed growth and what the pool holds. If the pool is short, the rest stays owed to you and later top-ups cover it. It is not guaranteed.

Level and royalty income are already yours

They are credited to your balance when earned, so they pay out in full, minus the 5% fee.

Where the 5% goes

It is the admin's income, and the only income the admin takes from the plan.

One contract holds the plan. Nobody owns it.

Every balance, every pool and every rule in this deck lives in one smart contract on BNB Smart Chain. Once deployed, nobody can change it.

The plan contract

No owner

- **Immutable:** no pause, no upgrade, no admin switch. The rules are the same for every wallet, including ours.
- **Non-custodial:** you top up and withdraw from your own wallet and sign every transaction.
- **No sweep:** no function can move the growth pool or a member's balance.
- **Open to check:** every balance, level and royalty day can be verified on BscScan.

Admin income

5 % of each withdrawal

The only money the admin earns. It is taken from withdrawals, never from your 100 USDT top-up and never from the growth pool.

From top-ups	0%
From withdrawals	5%

Active directs drive everything. Not total directs.

A direct counts only while their own term is active. When it ends, your rate, levels and royalty can drop until they top up again.

Your growth rate

5 active directs = 10%

Each active direct adds 1% a day, up to 5.

Your unlocked levels

10 active directs = 100 levels

Each active direct opens 10 more levels of income.

Your royalty

10 active directs, daily

Checked at every 00:00 UTC boundary, inside your 100 days.

Good habits

- **Keep your own term active** or level income lapses.
- **Watch "Ends soon"** on the Team tab before a direct's term ends.
- **Mind the royalty clock:** 100 days start at your first top-up, not when you qualify.
- **Never promise a return.** Show people the rules and let them check the contract.
